Education

Satyug Darshan Institute of Engineering & Technology
B.Tech in Computer Science Engineering

2022 – 2026
Faridabad, Haryana

Experience

Technical Engineer Intern

Aug 2025 – Nov 2025

VAAAN Infra

Faridabad, Haryana

- Built a Python automation tool to analyze FASTag–ANPR mismatch data from CSV files, eliminating manual verification and improving operational efficiency.
- Generated automated plaza-wise mismatch and accuracy reports, enabling faster resolution of incorrect number plate reads and billing discrepancies.
- Diagnosed and resolved system-level issues using debugging workflows and log analysis.
- Improved operational efficiency through troubleshooting documentation and workflow optimization.

Projects

ResumeIQ — AI Resume Analyzer

2026

React.js, Vite, Django REST Framework, PostgreSQL, Google Gemini API, JWT, AWS S3

- Developed a full-stack resume analysis platform featuring real-time ATS scoring, gap analysis, and tailored bullet-point recommendations.
- Integrated Google Gemini API using structured JSON schema response prompting to enforce parser accuracy.
- Designed an interactive role-based AI mock interview engine and a scheduling marketplace for peer-to-peer live mock sessions.
- Built a Kanban Job Application Tracker enabling candidates to organize applications from bookmarked stages to active offers.

SaaS Task Tracker

2025

React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT

- Developed a multi-tenant SaaS task management platform with role-based access control (RBAC) for Admin, Manager, and Employee users.
- Implemented secure authentication and authorization using JWT and protected API routes.
- Designed RESTful APIs using Express.js and Prisma ORM with PostgreSQL database integration.
- Implemented tenant-based data isolation to support multiple organizations on a single platform.

Ray Voice Assistant

2025

Python, NLP, Speech Recognition

- Developed an intelligent voice assistant supporting 15+ command categories using Natural Language Processing.
- Integrated speech-to-text processing with custom intent recognition.
- Automated desktop workflows through voice-controlled commands.

Real-Time Object Detection System

2024

YOLOv8, OpenCV, PyTorch

- Implemented YOLOv8-based object detection achieving 87% mAP on custom datasets.
- Optimized inference speed for real-time industrial applications.
- Applied computer vision techniques for object localization and classification tasks.

Technical Skills

Programming Languages: Python, JavaScript, Java, SQL, C

Frontend: HTML, CSS, React.js, Responsive Design

Backend: Node.js, Express.js, Django REST Framework, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Tools & Platforms: Git, GitHub, Prisma ORM, AWS, Google Cloud, Postman, AWS S3

ML / AI: PyTorch, YOLOv8, OpenCV, NLP, LLMs, Google Gemini API

Certifications

- AWS Academy Cloud Foundations – Amazon Web Services
- Google Cloud Study Jams – Generative AI
- HackerRank Problem Solving (Basic)
